

Glass Melting & Process Improvement course for Indian glass industry

Date : April 20-22, 2021 (3 Days)
 Location : Navi Mumbai, India
 Organised by : CelSian and ARCVS Technology India

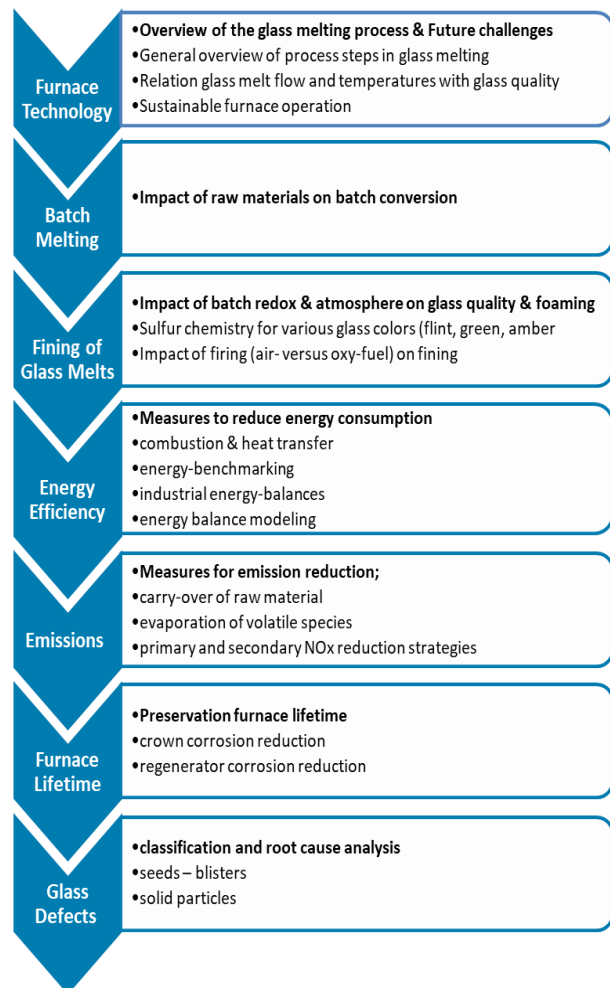

Global competitive manufacturing hubs are critical to improve your business as it has the potential to add 7% to GDP. Further relooking our business ecosystem to cope also with the recent pandemic forces us also to optimize process efficiency. This improves both economics and sustainability of glass production without compromising quality. Here, the challenges are plenty, so let's focus & deep dive into "Glass Melting & Process Improvement" to guide into a sustainable and cost-effective glass melting process.

Results

- You have a clear picture of the future challenges in glass production in relation to energy efficiency, sustainability and glass quality.
- You are aware of strategies, technologies and tools to reduce energy consumption
- You know how to influence emissions (carry-over, dust and NOx) by raw material selection, combustion optimization and secondary techniques
- You understand how to preserve furnace lifetime by limiting crown and regenerator corrosion
- You recognize solid and gaseous defects and have ideas to solve a crisis and improve glass quality by batch optimization and process improvement.

Contents

The topics covered are listed below.

Audience

For experienced glass experts (> 5 years of experience) willing to deepen their understanding on specific topics. Employees from the Indian glass industry or suppliers, in various areas:

- Production : batch, furnace and melting,
- Emission control and reduction,
- Research and Development,
- Furnace design and construction,
- Refractories, raw materials, gas, sensor suppliers...

Training methods

Blended learning approach mixing lectures, open discussions, exercises and case studies. Participants will receive a comprehensive textbook on industrial glass technologies (about 500 pages), the presentations (pdf) and a training certificate. The number of participants is limited to 30.

Investment

Training costs 1 800€ per participant; Early bird registration (before December 1, 2020 and with a maximum of 10 trainees) results in a discount of 300€ per participant. Price includes 3 lunches and 1 dinner. It excludes accommodation, travelling, tax and duties.

Cancellation fees :

- > 4 weeks before training Free of charge
- > 1 week before training 50% price
- otherwise Full price

CelSian reserves the right to cancel up to two weeks prior to the training, proposing new dates or refunds.

We appreciate the current consequences of the global Covid-19 pandemic and we try to be as flexible as possible for our trainees. Therefore, we may decide to offer online access depending on their country of origin and the pandemic status prior to the training.
